Physics, Astronomy and Engineering. Critical Problems in the History of Science and Society. International 32nd Congress of the Italian Society of Historians of Physics and Astronomy SISFA 2012

This book presents the Proceedings of 32nd International Congress of the *Italian Society of Historians of Physics and Astronomy* (SISFA) held in Roma on 2012, 27th–29th September (more than 80 participants from 11 countries). It was mainly organized in collaboration with the *Faculty of Engineering*, University of Roma La Sapienza, Italy, the *Research Centre for Theory and History of Science* (RCTHS), University of West Bohemia in Pilsen, Czech Republic. The International Proceedings SISFA 2012 represents the historical current state of the art of offering new perspectives in history of physics, astronomy, engineering, sciences & societies and related epistemological and philosophical disciplines.

The authors explained the various ways in which sciences worked in the past. Particularly distinguished scholars like Walter Noll (*Carnegie Mellon University*, U.S.A.), Jean Dhombrès (*CNRS–École des Hautes Etudes en Sciences Sociales*, France), Alejandro Nisati (*CERN*, CH) and a special *Foreword* by Chris Bissell (*Open University*, U.K.) helped to create the volume for absorbing reading.

**Raffaele Pisano** (France) is Lecturer–Researcher of *History of physics, History and epistemology of science, and Science & society studies* at the *Sciences, sociétés, cultures dans leurs évolutions*, University of Lille 1, France; head of the *Research Centre for the Theory and History of Science*, University of West Bohemia in Pilsen, Czech Republic. Recently: *lazare and Sadi Carnot. A Scientific and Filial Relationship* (2013, Netherlands: Springer) with Charles Coulston Gillispie, Princeton University.

**Danilo Capecchi** (Italy) is Professor of *Structural Mechanics and History of science* at the Faculty of Architecture, University of Roma la Sapienza, Italy. Recently: *History of Virtual Works Laws. A History of Mechanics Prospective* (2012, Italy: Springer–Verlag–Birkhäuser).

**Anna Lukešová** (Czech Republic) is Ph.D. Candidate at the *Department of Philosophy* and member of the *Research Centre for Theory and History of Science*, University of West Bohemia in Pilsen, Czech Republic.

Pisano R, Capecchi D, Lukešová A (eds) (2013). *Physics, Astronomy and Engineering. Critical Problems in the History of Science and Society. Proceedings of the 32nd International Congress of the Italian Society of Historians of Physics and Astronomy*. The Scientia Socialis Press, Šiauliai. ISBN: 978-609-95513-0-2

# Contents

## Foreword

Chris Bissell (United Kingdom) i

## Introduction

Raffaele Pisano (France), Danilo Capecchi (Italy)  
Anna Lukešová (Czech Republic)  
*Editors* xi

## Plenary Speakers

- An Outline of History of Mechanism Design in Servicing Science**  
Marco Ceccarelli (Italy) 1
- The Role Played by Mathematics during the Revolutionary and Imperial Paris up to the Restoration in the Education of Engineers with Lazare Carnot as a Witness**  
Jean G. Dhombres (France) 11
- Some Methodological Remarks on the Replication Method**  
Peter Heering (Germany) 25
- The Earth Floats Unsupported in Space**  
Radim Kočandrle (Czech Republic) 39
- Physics and Mathematics without Coordinates**  
Walter Noll (United States of America) 53

## Invited Guest Physics Lecture

- The Search for the Standard Model Higgs Boson at the Large Hadron Collider**  
Aleandro Nisati (Italy–Switzerland) 63

## Invited Talks

- The Qiqi Tushuo by the Jesuit Johann Schreck: Europeans Theatra Machinarum in China in the 16th Century**  
Michela Cigola (Italy) 77
- Willem Jacob 's Gravesande's Methodological Views**  
Steffen Ducheyne (Belgium) 87
- The Helium Atom and the Majorana Solutions to the Two–Electron Problem**  
Salvatore Esposito (Italy), Adele Naddeo (Italy) 95
- The Structures of Spacetime Geometry**  
Mauro Francaviglia (Italy), Lorenzo Fatibene (Italy) 103
- Historical Approach to Physics according to Kant, Einstein, and Hegel**  
Young Suh Kim (United States of America) 113
- The Concept of Work in the Development of Applied Mechanics: Carnot and Coriolis**  
Agamenon Rodrigues Eufrásio Oliveira (Brazil) 123
- Early Modern Histories of Astronomy: the Views on the Progress of Astronomy**  
Daniel Špelda (Czech Republic) 131

## Contributes

- The History of Science and Science Education: a *Planetarium* at School**  
Enzo Bonacci (Italy) 141
- Digitization and Online Publishing of the Whole Historical Archives of the Department of Astronomy of the University of Bologna**  
Fabrizio Bònoli (Italy), Elena Cenacchi (Italy), Agnese Mandrino (Italy), Raffaella Stasi (Italy), Diego Zuccato (Italy) 147

<b>The Ontological Levels of Scientific Theories and Technical, Ethical and Educational Progress</b> Giuseppe Boscarino (Italy)	153
